

Homemade Citrus Cleaner

INGREDIENTS

Quart sized Mason Jar

Citrus Peels

White Vinegar

INSTRUCTIONS

Fill the jar 3/4 full with your lemon peels. Pour white vinegar over the lemon peels. Let it set for a minute and then top off with more vinegar, so the lemon peels are completely submerged. Cover with a lid and band and set in a dark cupboard for two weeks. You might want to mark the top of the lid with the date in case you forget.

In two weeks, pour the vinegar through a strainer. Dilute with two parts water to one part lemon vinegar. Use on windows, counter tops, mirrors, and as a general multi-purpose cleaner. The vinegar smell will leave when it evaporates, leaving behind the lemon scent. You can use any citrus, orange or lime, or add some herbs for your own unique custom blend.

* Please make sure to double-check if it is safe to use vinegar on your surfaces.
